

## Jasmin Johnson, CPA, MBA, ARc

[jasmin.c.johnson@gmail.com](mailto:jasmin.c.johnson@gmail.com)

<https://jasminjohnson.github.io/>

### Summary:

- CPA and ARc (Associate in Reinsurance) with 15+ years strong financial reporting/analysis, problem solving experience in property and casualty insurance/financial service industry.
- 2 + years hands-on experience in implementing dataset analysis based on Python, SQLite and MongoDB across from different data source.

### Skills:

Data Analysis	Reinsurance Modeling	Financial Analysis
Dashboard	Pro-Forma Financial Statement	Insurance Data Analysis
Python, SQLite, MongoDB	Financial Reporting	Setup General Ledger

### Experience:

#### EPG Tech LLC

*Feb 2017 - Present*

Senior Consultant

- Data Analysis – use Python to import/merge datasets from different sources, perform Excel function in Python to effectively verify the accuracy of dataset and apply Python codes to reshape the datasets for financial/data analysis.
- Data Scrapping – collecting data from Twitter API with Python and store in MongoDB for analysis
- Data Visualization – use Python to convert files into SQLite database, then set index/join tables/query the dataset and plot/visualize the dataset.
- Dashboard – read data into Plotly and create interactive dashboard.
- Financial Modeling/Stress Test – develop key metrics/assumptions for financial modeling and change assumptions for stress test. Use Pandas Time Series to analyze financial data in different frequencies based on data distribution. Develop the code to reload/repeat the data analysis process in Python and export the result to Excel or CSV on daily, weekly, monthly, quarterly or yearly basis. For data testing, use data time series to generate dates (with/without business day, weekends) for data testing.
- Implement changes to system logics for report changes, data quality issues, and other required changes to existing logic for appropriate alignment for regulatory reporting.
- Reinsurance – evaluate and develop reinsurance reports with underwriting, IT, actuary departments and external party to determine reinsurance needs and comply with reinsurance reporting requirement.
- Business Evaluation – evaluate business plans for potential investment, and develop pro-forma financial models for business strategies and plans.
- Financial Analysis/Reporting - utilize data analytics tools to perform analytics on regulatory reports, develop and streamline financial reporting process to comply with regulatory/lender requirements

#### Physicians Reciprocal Insurers – Roslyn NY

Senior Consultant

*May 2012 to Jan 2017*

Controller

*May 2000 to Jun 2010*
