- | | | |
|-----------------------------|------------------------|-----------------------|
| ➤ Data Analysis Automation | ➤ Pro-forma Financial | ➤ Financial Analysis |
| ➤ Python, SQLite, MongoDB | Statement Modeling | ➤ Financial Reporting |
| ➤ Data Visualization-Plotly | ➤ Reinsurance Modeling | |

Experience:

EPG Tech LLC

Senior Data Analysis Consultant

4/2017 to present

- Data Analysis – use Python to import/merge datasets from different sources, perform Excel function in Python to effectively verify the accuracy of dataset and apply Python codes to reshape the datasets for financial/data analysis.
- Data Scrapping – collecting data from Twitter API with Python and store in MongoDB for analysis
- Data Visualization – use Python to convert Excel file into SQLite database, then set index/join tables/query the dataset and plot/visualize the dataset
- Dashboard – use Plotly to visualize data analysis
- Financial Modeling/Stress Test – develop key metrics/assumptions for financial modeling and change assumptions for stress test. Use Pandas Time Series to analyze financial data in different frequencies based on data distribution. Develop the code to reload/repeat the data analysis process in Python and export the result to Excel or CSV on daily, weekly, monthly, quarterly or yearly basis. For data testing, use data time series to generate dates (with/without business day, weekends) for data testing.
- Implement changes to system logics for report changes, data quality issues, and other required changes to existing logic for appropriate alignment for regulatory reporting.
- Reinsurance – evaluate and develop reinsurance reports with underwriting, IT, actuary departments and external party to determine reinsurance needs and comply with reinsurance reporting requirement.
- Business Evaluation – evaluate business plans for potential investment, and develop pro-forma financial models for business strategies and plans.
- Financial Analysis/Reporting - utilize data analytics tools to perform analytics on regulatory reports, develop and streamline financial reporting process to comply with regulatory/lender requirements
